INTRODUCTION

The Historical Metallurgy Society Ltd was formed in 1979 to study and preserve our cultural heritage in the field of historical metallurgy, and to make knowledge of it available to the public, historians, academics, etc. It is the only body active in this field in the United Kingdom. It organizes meetings and an annual conference, and publishes a journal, *Historical Metallurgy*, twice yearly.

The archives of the society dating from the foundation of its predecessor, the Historical Metallurgy Group, in 1962, have been deposited with the Ironbridge Gorge Museum Trust. The records include the minutes, accounts and correspondence of the society, papers relating to annual conferences, etc. The greater part of the archive consists of papers relating to the history of metallurgy amassed by the late Mr Charles Blick, a founder member of the Historical Metallurgy Group, who was successively treasurer, secretary and president of the society. Many of these records reflect his years as the society's active conservation officer, but they also include items relating to the history of iron and steel collected in a lifetime working in the industry, as well as his work for the United Steel Company and British Steel Corporation. They date mainly from the 1950s to the 1990s, but there are some earlier items, and they relate to all parts of Great Britain and Ireland, as well as some overseas countries.

Charles Richard Blick began his career in 1934 as an apprentice in the United Steel Company. He then moved to the Workington Iron and Steel Co, a branch of United Steel. By 1938 he was assistant blast furnace manager at the Appleby-Frodingham Steel Co works in Scunthorpe. Following war service in the Royal Artillery he returned to Workington in 1947 as assistant to the general works manager, and in 1953 became assistant commercial manager. From 1966 he was at the Sheffield divisional headquarters, where he was public relations officer to what became the Midland group of the British Steel Corporation. In 1991 he published *Early Metallurgical Sites in Great Britain BC 2000 to AD 1500*, which provided detailed descriptions of the field remains of fifteen sites relating to the mining and smelting of iron, copper, lead and gold. He died in 2001.

The collection also includes records of the British Refractories Research Association, Mellor Laboratories, Shelton, Stoke on Trent, and the manuscript of R A Mott's *Triumphs in Iron and Steel*, all of which have been presented to the society.

Other papers donated to the HMS are added to the archive as appropriate.

Audio tape recordings in the collection have been removed; copies on CD are available.

The records are held in the Ironbridge Gorge Museum Library and Archives, Ironbridge, Telford TF8 7AW (01952 432141).

PAPERS OF CHARLES BLICK

Metallurgy: general

- 79 Open University Educational Enterprises: correspondence, papers and tape recording concerning courses on history of technology. 1984–5 (1 file).
- 80 Ancient mining and metallurgy: correspondence and papers concerning conference at University College of North Wales, Bangor. 1986 (1 file).
- 81 Early metallurgical sites in Great Britain: correspondence, papers and offprints concerning C R Blick’s *Early Metallurgical Sites in Great Britain BC 2000 to AD 1500* (1991), its sale, reviews, etc. 1988–93 (1 file).
- 82 MS of *Early Metallurgical Sites in Great Britain*, with correspondence and photographs relating. 1991 (1 file).
- 83 Metallurgy in art: correspondence and photographs concerning a series of reproductions of paintings depicting early metallurgical processes (see list in *Historical Metallurgy*, Vol 8 No 1 (1974), 55–7). 1991–2 (1 file).

Iron and steel: general

- 84 Open-hearth furnaces: articles and publications on history, correspondence and papers concerning closure of works, preservation, etc. 1946–81 (1 file).
- 85 Northern England: correspondence, papers and publications concerning iron and steel industries in Yorkshire, Teesside and Northamptonshire. 1946–84 (1 file).
- 86 Blast and blowing: correspondence and offprints of articles on blast, blowing engines and tuyeres. 1954–89 (1 file).

- 87 Hammers: correspondence and offprints of publications concerning James Nasmyth, Tiny Tim (giant hammer), and general history of forging. 1967–93 (1 file).
- 88 Blast furnaces: correspondence, papers, articles, etc, on development of blast furnaces, and furnace practice. 1968–97 (1 file).
- 89 ‘Miscellaneous’ [iron and steel]: Bessemer at Workington, HMS conferences and publications, etc. 1970–9 (1 file).
- 90 Coke: correspondence and papers concerning coke and carbonization of lump coal. 1980–3 (1 file).
- 91 Wales and the west country: general correspondence and papers concerning iron industry in Wales, Wiltshire, Herefordshire and Forest of Dean, including photographs of Ebbw Vale and Llanwern steelworks. 1980–6 (1 file).
- 92 West Midlands iron industry: correspondence and papers concerning various early blast furnaces (including sites in Montgomeryshire). 1981–91 (1 file).
- 93 Early furnace technology: papers concerning symposium held at the British Museum. 1982 (1 file).
- 94 Early blast furnaces: correspondence with J E Rehder and others, and papers relating to early furnaces. 1984–91 (1 file).
- 95 Iron – conservation and technology: correspondence and papers concerning conference held at University of Bristol. 1985 (1 file).
- 96–7 Wrought iron: correspondence and papers concerning seminar held at Ironbridge. 1986 (2 files).
- 98 Bessemer converter: correspondence and papers concerning small pilot Bessemer converter from Barrow ironworks in Science Museum. 1987–8 (1 file).
- 99 Acid Bessemer steelmaking on Teesside: paper by Gareth Fletcher and press cuttings. 1987–93 (1 file).
- 100 Iron: draft paper on experiments on iron smelting by R Adams and R F Tylecote. 1988 (1 file).
- 101 ‘Early blast furnace file’: recording form, correspondence, papers and photographs relating mostly to Backbarrow. 1988 (1 file).
- 102 ‘Early blast furnaces in England, Scotland and Wales: a table of known visible remains’, by Charles Blick: correspondence, papers and photographs re various sites. 1980s (1 file).

- 103 Early blast furnaces: completed forms re remains of early blast furnaces, with correspondence and papers and some photographs relating. 1987–8 (1 file).
- 104 Early blast furnaces: ‘surplus material’ – papers and photographs concerning Rockley furnace, South Yorks, Bedlam, Shrops, Darkhill, Gloucs, and Astley, Worcs. 1977–82 (1 file).
- 105–8 Blast furnaces: correspondence, papers, publications, and photographs concerning visible remains of early blast furnaces in UK. 1962–87:
 105 Cumbria (1 file).
 106 Wales (1 file).
 107 Scotland (1 file).
 108 Northern Ireland and Republic of Ireland (1 file).
- 109 Iron and steel and coal industry: correspondence and papers concerning selection of sites for statutory protection. 1988–93 (1 file).
- 110 ‘Grompy’: correspondence and papers concerning ‘grompy’ (reduced lumps of iron ore), including letters from Professor Jerzy Piaskowski (Poland), and from Peter Crew (Plas Tan-y-Bwlch), with offprints of articles on iron industry in north-west Wales. 1990–1 (1 file).
- 111 Henry Baker: letters from Henry G Baker (Thrybergh, Rotherham), with offprints of articles on aspects of iron industry: Samuel Walker, Kimberworth ironfounder, John Baker & Co, and Henry Bessemer. 1990–1 (1 file).
- 112 Abstracts: copies of abstracts of articles on iron industry sent to Janet Lang (British Museum). 1990–2 (1 file).
- 113 ‘Melting Pot’: copies of W K V Gale’s ‘Melting Pot’ column in *Steel News*, with letters from Gale and others relating. 1990–3 (1 file).
- 114 Early blast furnaces: correspondence, notes, negatives, etc, relating to ‘Early blast furnace notes’ (*Historical Metallurgy*, Vol 25 No 1 (1991), 47–56); includes material concerning various sites, especially Trimsaran and Cefn Cribwr ironworks in south Wales. 1991–3 (1 file).
- Iron and steel: notable men**
- 115 Henry Bessemer (1813–98): correspondence and papers re Workington, Henry Bessemer, the Bessemer converter, and objects associated with Bessemer. 1981–5 (1 file).
- 116 Henry Cort (1740–1800): correspondence, papers, photographs and tape recording concerning Henry Cort, the puddling process and wrought iron; includes brochure and photographs on closure of Atlas Forge, Bolton. 1974–89 (1 file).
